

**Rx Only****For Topical Dermatological Use Only****Product Description:**

SiOxC Cream is a fragrance free, preservative protected, non-sterile, topical cream intended for management of pruritus and dryness of skin in atopic dermatitis and allergic contact dermatitis. SiOxC Cream supports a moist environment. SiOxC Cream is provided prescription only in various sizes for single patient use.

Indications for Use:

SiOxC Cream is a skin emulsion indicated for management of pruritus and dryness of skin in atopic dermatitis and allergic contact dermatitis. Not to be used on breached or compromised skin or open sores.

Contraindications:

SiOxC Cream is contraindicated in persons with known hypersensitivity to any of the components of the formulation.

Warnings:

- SiOxC Cream does not contain a sunscreen and should always be used in conjunction with a sunscreen in sun exposed areas.
- Keep this and similar products out of the reach of children.
- Follow directions for use. If condition does not improve within 10 to 14 days, consult a physician.

Precautions and Observations:

- Use SiOxC Cream only as directed.
- SiOxC Cream is for external use only and should not be ingested or taken internally.
- SiOxC Cream is for single patient use only. Do not share between patients.
- To ensure continued effectiveness of the SiOxC Cream preservative, do not leave SiOxC Cream containers open for extended durations or contaminate the cream. For example, close the jar after each use and use clean hands to remove cream from the jar.
- If clinical signs of infection are present, appropriate treatment should be initiated. If clinically indicated, use of SiOxC Cream may be continued during the anti-infective therapy.
- If the condition does not improve within 10-14 days, consult a physician.
- SiOxC is intended for use on dry intact skin.

**Instructions for Use:**

Apply in a thin layer to the affected skin areas 2 times per day (or as needed) and massage gently into the skin.

Note: SiOxC Cream contains milled amorphous silica fibers that are highly absorbent, retain moisture, and promote a moist environment to treat dry skin. These fibers do not absorb into the skin. Remove residual fibers from the skin after the cream is absorbed.
